DÉCOR LIGHTING CATALOG

EUROFASE LIGHTING

Diversity, innovation, passion, and design. Our success is made up of outstanding, hard-working individuals collectively moving as one, striving to provide the best solution to all your lighting needs.

This catalog is a presentation of our decorative fixtures that offer various styles that will accent or define your space. Lighting is not just a thingamabob created to help you see better, it is a reflection of your personality and embodies individual artistry. We take pride in our products and believe in what we do.

For a full list of all our designs, we invite you to visit eurofase.com.

BY THE WAY...

Did you know we also manufacture a variety of architectural lighting? Make a statement with our Function collection. We make finding the ideal light for any home décor or commercial setting a creative and exciting lifestyle experience.

LIGHTING SYSTEMS

The function of design is letting design function. With our architectural lighting fixtures you can effectively accent or define your desired space. Our extensive product line encompasses architectural lighting from modular systems to mini profiles.

For a full list of our architectural and modular profiles, please refer to our Function catalog or visit eurofase.com.

ROUTE

Route is a system of connectable extruded profiles with optional lighting inserts that are selected based on the intended purpose.

- Mount Between Walls
- Surface Mount
- Pendant

SPOT • DOWNLIGHTS • MULTIPLES • LENS

CONSTRUCT

Construct is the smaller version of Route, perfect for when the Route system is too large for the proposed space.

- Recessed (Trim + Trimless)
- Surface Mount
- Pendant

SUSPENDED • MULTIPLE • LENS • DUAL BAFFLE

DUAL LENS • WALL WASH • MULTIPLE SPOT • SPOT

MAST

Easily recognizable, the Mast collection is a system of connectable extruded rounded profiles with rotatable lighting inserts that can swivel for specified lighting.

- Surface Mount

UNIQUE HANDMADE PATTERN

PAGET

Multiple layers of monochrome sugar glass ripples are encased in clear glass plates that are all handmade, creating one-of-a-kind works of art with no two pieces exactly the same. Each piece cascades in a mesmerizing, rhythmic pattern. A soft white glow from the recessed LED lights emanates from each piastra glass, which is hand-formed, pressed glass made from techniques that date to the 13th century.

CAPSULE STYLE

WHITE ACRYLIC LED

FORSTER

Multiple white acrylic pieces form rings of LED light accented by black trim. The small detail in the halos add dimension and texture to the otherwise simple form. The dark edges create a slight rustic appearance to the overall design adding character and a soft industrial quality. Varied sizing offers 1-tier or 3-tier options.

PHILLIMORE

Sophisticated charm exuberates from each of the ice glass orbs that hang from a champagne gold bar. Curved on one end, the gold band adds dimension and a unique quality to this fixture. The orbs asymmetrically placed still balance out the design by strategically placing more crystal-like globes opposite the bend.

MUCCI

A new custom system for lighting, the minimalist Mucci collection features a black aluminum body in round and rectangular options to bring a sleek, contemporary design to multiple environments. Integrated LED lighting is built into the fixture frame to create one unified piece, with the option for an inner or outer glow in the circular chandeliers. Mucci is fully customizable with multiple light modules that can be easily attached to a copper power rail above the black aluminum frame for tailored directional lighting.

MUCCI

MATTE BLACK

Custom lighting made just the way you want it. This low-voltage system creates a safe environment that reduces the risk of shock despite its exposed copper rail. After selecting your pendant, add your accessories based on functionality and style. A special hook design allows for easy attachment to hang modules on the inside or the outside of the ring. Add as many modules as you would like, up until 70 watts max.

COLLECTION

LED MIRRORS

EFFICIENT SOURCE OF LIGHTING

LED mirrors provide full illumination and highlight your entire space with clear and even lighting. Choosing Eurofase LED mirrors is a simple way to add a touch of elegance, sophistication, and boldness.

More than just a bathroom accessory, our mirrors can be placed in various areas. Try using them to elevate a foyer, bedroom, dressing room, bathroom, or hospitality setting.

EUROFASE MIRROR STANDARD

Many of the cheaper LED mirrors in the market use thinner, lower quality painted steel. Our LED mirror frames are attached with a rubber gasket making them damp rated and durable.

We package our mirrors with added layers of safety to ensure that they're not damaged during delivery.

- Solid rigid frames with powder-coated metal to resist corrosion
- Anodized metal finish that gives the mirror a clean and stylish look
- Custom made drivers and LED tape within the mirrors to deliver consistent lighting
- Our mirrors are made with the highest quality glass the industry has to offer

THE PURSUIT OF PERFECTION IS THE
PURSUIT OF SWEETNESS AND LIGHT

LED

BENEFITS

WHY CHOOSE LED?

Eurofase LED mirrors make a bold statement while showcasing modern elements, merging form and function in a brilliant way. Undeniably sleek and displaying high-tech flair, our mirrors are equipped with integrated LED technology for seamless illumination and energy efficiency.

Quality LED lights are safer, sturdier and last longer than other lights. Using or switching to LED lighting generates energy savings by reducing the amount of energy needed. LED lights are 300% more efficient than fluorescent bulbs and 1,000% more efficient than incandescent bulbs. They have a long operational life that can last approximately up to 11 years before needing to be replaced.

Generating almost no warmth, LED lights are much cooler to the touch reducing accidental burns and can be left on for hours. LEDs are much more durable withstanding even the roughest conditions. Designed to focus its rays by emitting light in a specific direction, LEDs reduce the need for reflectors and diffusers that can trap light.

With all these benefits, packed into our smart mirrors, it's hard to avoid this clear cut choice. Easily boost comfort and productivity of your space with a Eurofase LED mirror.

FEATURES

KEY ASSETS

TOUCH SENSOR SWITCH

A touch sensor switch is one of the simplest kinds of tactile sensors, sensitive to touch, force or pressure. An integrated touch switch controls ON/OFF states as well as dimming options.

DURABILITY

Bathrooms typically generate a lot of steam and moisture. This is why it is important to incorporate mirrors that prevent those spotty unattractive edges like our copper free mirrors which counteracts black edge corrosion.

ROCKER SWITCH

A rocker switch is a spring-loaded electrical ON/OFF switch that rocks back and forth. Our waterproof ON/OFF switch offers 3 states: off, 3000K, and 4000K.

CCT CCT OPTION

Correlated color temperature (CCT) is the term used to reference the color of light. All our mirrors come with CCT or the option to add it and can be accessed with the touch of a finger. Available in 3000K, 4500K, and 6400K.

MIRROR IMAGE

Mirrors form perfect images unless they are imperfectly constructed. At Eurofase we use high quality mirrors made of distortion free glass for clarity.

CUSTOMIZATION

OPTIONAL FEATURES

All of our mirrors have the option to be customized to suit each preference and match your vision perfectly. There is no end to the possibilities we can create to ensure that the products you receive are exactly what you want. Our customization ranges from something as simple as shape or size to something more complex like an LED digital clock or a built-in TV. For more technical details or customization options currently not listed, please contact one of our sales representatives for further assistance.

NO SHADOWS

Regular fixtures in bathrooms often create shadows, altering the clarity of your reflection. A back-lit mirror will provide full illumination and highlight your entire face with clear and even light. That is why LED back-lit mirrors are a top choice for makeup artists and hairstylists.

STYLE

Choosing a Eurofase LED mirror is a simple way to add a touch of elegance, sophistication, modernity, and minimalistic style to your space. We carry a variety of mirrors to suit every need ranging from cabinets, free-standing, tri-folds and standard mirrors with an array of styles to suit your space.

BLUETOOTH SPEAKER

Create an engaging environment by adding a Bluetooth speaker to your LED mirror. Easily connect a cell phone to answer a call or play music.

DEFOGGER

A demister device removes liquid droplets and leaves a designated area clear with heated pads to dispel fog effortlessly. Getting ready will be a breeze even after a warm shower.

DIGITAL CLOCK

Never be late again! A built-in digital clock eliminates the need for multiple devices. 12- and 24-hour systems are available.

MAGNIFIER

Improve image clarity with a built-in magnifying glass with custom 3x or 5x magnification. LED light shines from a frosted ring for added brilliance.

TELEVISION/MONITOR

Don't skip a beat during your morning routine and watch the news or your shows while you get ready in the bathroom. Upgrade to the Android system for the touch screen and more functions.

Please note that some television options are limited due to technical specifications.

GLASS SHELF (MIRRORED CABINET)

Add a custom glass shelf if more storage space is required. Available in transparent or sandblasted (frosted) glass.

CCT
TCC

CCT

CORRELATED COLOR TEMPERATURE

Correlated color temperature (CCT) defines the color appearance of a white LED. Color temperature is specified in Kelvin. Depending on its CCT, the light will either be classified as warm, neutral, or cool.

Light your space with carefully crafted mirrors that house an integrated touch screen for correlated color temperature options. With dimmable capabilities, our LED mirrors are soft enough to serve as a night light and bright enough for full daytime illumination.

From a warm white to cool white, you can customize your lighting for specific uses and see things under a new light with just a touch of a finger. The ability to control light color allows for better viewing and clarity as colors appear differently under different lighting conditions.

LIGHT CLASSIFICATION

WARM

NEUTRAL

COOL

AMBIANCE

Areas that need low light intensity for a cozy, calm, inviting and intimate space

Light intensity applications for bright and vibrant mood

Special applications that need high light intensity and good color rendition for a crisp and invigorating space

EFFECTS ON COLORS

- Enhances reds & oranges
- Blues appear darker
- Orange/yellow tint to whites and greens

- Enhances most colors equally
- Does not favor yellow or blue
- Neutral appearance

- Enhances blues
- Flattens reds
- Bluish tint to whites and greens

FULL RANGE CCT

Our new collection of mirrors are now available in a full range CCT. This means that there are more color temperatures to choose from than just the standard 3000K, 4500K, and 6400K that were previously offered. Just press and hold the touch sensor for the desired temperature that perfectly matches your every need.

GILDING TECHNIQUE

WHAT IS METAL LEAF?

Metal leaf is a thin metal sheet that is used for decoration and is available in gold, copper and silver. It is used on varying sized objects from a small glass to large frames for added luxury.

LUXURY IS AN ART

Gilding (metal leaf application) is a delicate process that requires specialized tools. It requires skill and technique for a flawless finish.

Some tools required for this process are a gilding cushion, a gilding knife, an adhesive and pumice powder. A clean surface, a room without any drafts and lots of patience are also key elements for successful application. Once applied properly and depending on how much handling they get, the gold foil can last for centuries.
